## About Me

Front-End Developer with 9 months of experience in React JS . Excellent at working a as well as part of a team, bringing a collaborative spirit to dynamic projects.

## My Projects

### WingsWheel Cycle Store

- Created a dynamic, responsive React.js and Bootstrap website with approximately 7 to 8 pages.
- Implemented search and filter functionalities for easy product discovery.
- https:/wings-wheel.netlify.app/

### Favalier Gaming Website

- Succaessfully replicated the Favalier App website, comprising 7 pages, through a meticulous cloning process.
- Applied React.js to recreate the user interface while maintaining the design integrity.
- https:/favaliergamingapp.netlify.app/

### Property Hub Website

- Contributed to a 6-page Property Hub website, specializing in buying and renting homes and apartments.
- Developed an advanced filter page for efficient searches based on company, price, and property type.
- https:/propertyhub-app.netlify.app/

### Sharp Note Website

- Developed Sharp Note, a React-based website for note creation, deletion, and updates. Implemented a Todo List page with functionalities to add, delete, and update tasks.
- Ensured a smooth and intuitive experience for users in organizing and updating their notes and todo lists.
- https:/propertyhub-app.netlify.app/
